

Deployment Plan

Warehouse AMR Deployment

Customer	ABC Logistics
Project	Warehouse AMR Deployment
Project Owners	Rahul Sharma, Neha Joshi, Karan Gupta
Target Completion	14 September 2026
Current Status	BLOCKED

1. Project Objective

Deploy autonomous mobile robots (AMRs) for warehouse material movement and improve automated transportation between storage and dispatch areas. The deployment includes robot configuration, system integration, testing, customer validation, and final handover.

2. Deployment Scope

Milestone	Status
Requirement Gathering	Completed
Hardware Installation	Completed
Robot Configuration	In Progress
System Integration	Blocked
Testing & Validation	Open
Customer Acceptance	Open

3. Current Blocker

LiDAR Configuration Issue

Autonomous navigation testing is currently blocked because the LiDAR configuration requires changes. The issue is being investigated and corrected before navigation testing can resume.

Blocker	Incorrect LiDAR configuration preventing autonomous navigation
Owner	Rahul Sharma
Expected Resolution	Friday
Impact	Autonomous navigation testing and downstream validation are delayed

4. Upcoming Activities

- Complete LiDAR configuration changes.
- Resume autonomous navigation testing.

- Perform customer testing and validation.
- Complete system validation and resolve reported issues.
- Obtain final customer acceptance.
- Complete project handover and deployment documentation.

5. Customer Deliverables

- Deployment configuration documentation
- Robot installation report
- Testing and validation report
- System handover documentation
- Final project status and acceptance record

6. Communication & Status Tracking

Project updates received through customer calls, chat-style messages, or email-style updates are converted into structured project status using the AI update analysis workflow. The structured status is reflected in the project dashboard, task states, issues, and activity feed.

Demo document — synthetic data created for the FlytBase GTM Hackathon. No real customer data is used.
